Cardiovascular physiology pappano pdf windows 10 32-bit

Get a clear, accurate and up-to-date coverage of the physiology of the cardiovascular system. © 1996-2014, Amazon.com, Inc. ≤215 Cardiovascular physiology ≤315, a volume in the physiology series ≤315 Mosby, ≤1⁄21⁄2ologicologic physiology explains the foundations of this complex topic in a clear and concise manner, while helping you close the gap between normal function and the physiologic physiologic . ≥/pwards ≤3⁄4p voluntary gane ≤3⁄4b voluntary a fundamental understanding of cardiovascular physiology and how the cardiovascular system works in health and disease. 230 Illustrations (230 to full color) Elsevier 300 2019-01-10 00:00:00 in the values books Mosby's Fisiology Monograph No No Please Select Chapter 1 General description of circulation and blood The circulatory system Blood Trytrocitos Leucocitos Lymfocitos Blood Padenas Divided into groups by antigens located in summary erythrocytes Case 1-1 Chapter 2 Heart potential: The cardiac action potentials consist of several phases The main types of cardiac action potentials are the ionic base of slow and fast types of the rest potential that the rapid The response depends mainly on the sodium channels dependent on the voltage, the ionic base of the slow response drive in the heart fibers depends on the driving of currents of the local circuit of the rapid response drive of the heart excitability of a slow response depends on the activation and inactivation of the specific curves response An impulse can travel around .n³Ãicagaporp .n³Ãicagaporp al ed n³Ãicagaporp al ed n³Ãicagaporp al ed n³Ãicagaporp al ed n³Ãicagaporp al ed n³Ãicagaporp al ed n³Ãicagaporp al ed n³Ãicagaporp al ed n³Ãicagaporp al ed n³Ãicagaporp al artseum aÃfargoidracortcele al ed otis³Ãped sal ed s©Ãupsed sadasarter senoicaziraloped sal ed s©Ãupsed sadaicini sadavitca sedadivitca a necudnoc senoicaziraloped sal ed s©Ãupsed adartneer ed elcub Heart excitation Electrocardiography scale dyrhythmias occur frequently and constitute important clinical problems altered rhythms sinarcles blocking auriccular transmission blocks premature depolarizations of ectopian tachycardias Summary of fibrillation 3-1 Chapter 4 Heart pump The microscopic and multiple structure of the heart muscle (myocardial) MORFOLOGY CASE OF THE MORFOLOGY OF THE CELOLOLOLOL OF THE CELOLOG The heart: atrium, ventricles and valves The strength of the heart contraction is determined by the coupling of the contraction of excitation and the initial length of the sarcomer of the myocardial cells of excitation-contraction of excitation is mediated by the calcium mechanics of the heart muscle the contraction and sequential relaxation of the atrium. and the ventricles constitute the heart cycle, the ventricle ventricular echocardiography reveals the movement of the ventricular walls and the valves, the two main heart sounds are produced mainly by the closure of the heart valves, the ratio of volume of intact pressure or DI The ratio of astolic volume of active pressure or pressure-systolic-volumen-volumen of the post-volume heart cycle The principle of Fick is used to determine the metabolism of ATP cardiac expenditure and its relation to the mechanical relationship with the Mechanical Function Metabolism of fatty acids Carbohydrate Metabolism Interrelationship between fatty acids and carbohydrate metabolism Effects of plasma substrate and insulin levels O2 heart consumption and the link between ventricular function and cardiac metabolism summary Case 4-1 Chapter 5 The regulation of heart rate is controlled acaÃdrac acaÃdrac aimtirsid ed nºÃmoc n³Ãicavitca anu ecudni acaÃdrac aicneucerf al ed n³Ãicaripser al naluger seralucirua serotpecer sol y egdirbniaB ed ojelfer le ,rotpecerrorab ojelfer led s©Ãvart a esraluger edeup acaÃdrac aicneucerf aL ocaÃdrac otneimidner le ne neyulfni n©Ãibmat sotla s¡Ãm sortnec soL sacit¡Ãpmis saÃv saL sacit¡Ãpmis saÃv sacit¡Ãpmisarap saÃV socim³Ãnotua soivreN le euq le rop osac le rop etnemlapicnirp le rop the the Chemoreceptor Reflex Affects Heart Rate Ventricular Receptor Reflexes Play a Minor Role in the Regulation of Heart Rate Myocardial Performance Is Regulated by Intrinsic Mechanisms The Frank-Starling Mechanism Is an Important Regulator of Myocardial Contraction Force Changes in Heart Rate Affect Contractile Force Myocardial Performance Is Regulated by Nervous and Humoral Factors Nervous Control Cardiac Performance Is Also Regulated by Hormonal Substances Summary Case 5-1 Chapter 6 HEMODYNAMICS Velocity of the Bloodstream Depends on Blood Flow and Vascular Area Blood Flow Depends on the Pressure Gradient Relationship Between Pressure and Flow Depends on the Characteristics of the Conduits Resistance to Flow Resistances in Series and in Parallel Flow May Be Laminar or Turbulent Shear Stress on the Vessel Wall Rheologic Properties of Blood Summary Case 6-1 Chapter 7 THE ARTERIAL SYSTEM The Hydraulic Filter Converts Pulsatile Flow to Steady Flow Arterial Elasticity Compensates for the Intermittent Flow Delivered by the Heart The Arterial Blood Pressure Is Determined by Physical and Physiological Factors Mean Arterial Pressure Cardiac Output Peripheral Resistance Pulse Pressure Stroke Volume Arterial Compliance Total Peripheral Resistance and Arterial Diastolic Pressure The Pressure Curves Change in Arteries at Different Distances from the Heart Blood Pressure Is Measured by a Sphygmomanometer in Human Patients Summary Case 7-1 Chapter 8 The MICROCIRCULATION AND LYMPHATICS Functional Anatomy Arterioles Are the Stopcocks of the Circulation Capillaries Permit the Exchange of Water, Solutes, and Gases The Law of Laplace Explains How Capillaries Can Withstand High Intravascular Pressures The Endothelium Plays an Active Role in Regulating the Microcirculation The Endothelium is at the Center of Flow-Initiated Mechanotransduction The Endothelium Plays a Passive Role in Transcapillary Exchange Diffusion Is the Most Important ,aicnaticapac y aicnetsiser ed sosav sol ed .ralucsav aicnetsiser al ratnemua arap socit¡Ãpmis soivren sol ne nedneicsed alud©Ãm al ne negrus euq ocit¡Ãpmis
