Download the software update found on the device page. (If the "Aputed your Kindle" option is grayed out, this means that Kindle has not managed to locate the .bin file; confirm that you have placed it in the root directory and try again.) After rebooting your Kindle (don't worry if it takes a minute or more to finish restarting and upgrading), repeat the version check process by looking at the Device Information menu. Scroll down until you find your specific device; Click. Clearly, the firmware version we have in our paperwhite à (5.6.1) is behind the latest version until the time of writing (5.8.5). You will also find that sometimes specific applications will stop working because the time and date are incorrect and don't give any indication why they're not working. You will see the message "Your Kindle is updating" and your device must restart and apply the update. Problem: the update starts, but does not complete after the update is approved, the process starts as expected, but fails before the installation is completed. Read as we show you how to easily update your Kindle. You can also find the serial number by connecting your Kindle and looking in the device information menu. Then go ahead and start the installation process as described above. One more thing before you go, I hope the guide has been useful to you and you have achieved the intended goal on the Amazon tablet. That's where we get in. Use the above instruction to find out which software your device is currently running. Feel free to ask any questions you like below in the comments. The first and foremost step is that you identify which Kindle you have to ensure that you are comparing the right software version to yourand lowering the appropriate update. Dec 02, 2019 · If you use the actual Twitter app via the Amazon App Store, the font size adheres to the Kindle Fire settings. I tried out Twitter via Silk and the font was really small. The font settings within Twitter helped a bit, but even at its largest it's still pretty small. My suggestion is to download the Twitter app from the App Store.
